

marathon tiga SLX

The **heavy-duty** garage door operator for underground and multiple car parks

**with separate
control unit housing
(incl. control unit for
traffic lights)**

The benefits for the user and the installer:

- ▶ control unit is separable and lockable from the head due to the main switch
- ▶ no connection necessary over the head anymore
- ▶ only a connecting cable has to be fit on the ceiling
- ▶ all control elements in one housing (traffic light control, toroidal transformer and marathon control unit)
- ▶ big space provided in the new housing for additional electronical components like timer, stairway relay,...
- ▶ during the installation of the control unit the troughfare is not interferred
- ▶ accident protection due to electrical controlled force measurement with DPS (Dynamic Power System)
- ▶ controlled soft run in ramp form of a ramp without force lost
- ▶ energy saving operation thanks to a toroidal transformer
- ▶ connection for light barrier (photo cell) and safety edge
- ▶ integrated one-way street control (red/green)
- ▶ only with automatic closing
- ▶ galvanised and powder-coated track
- ▶ floating relay contact
- ▶ evaluation of integrated electrical or optical safety edge
- ▶ connection for TorMinal
- ▶ basic adjustments individually changeable via TorMinal:
 - lead time "open" and lead time "close"
 - opening time
 - clearing time
 - counting of cycles
- ▶ control via radio and / or push button
- ▶ radio receiver with 448 memory slots; memory module pluggable

LED traffic lights are easily pluggable to the control unit

SOMMER

marathon tiga SLX

The **heavy-duty** garage door operator for underground and multiple car parks

marathon tiga SLX – the benefits for underground and multiple car parks:

- ▶ with integrated radio receiver
FM 868.8 MHz (Somloq Rollingcode)
- ▶ with new robust housing
- ▶ with accident protection and controlled soft run

marathon tiga 800 SLX

item no. 4510V000

- 800 N traction force
- without track unit

marathon tiga 1100 SLX

item no. 4520V000

- 1100 N traction force
- incl. an additional ceiling bracket
- without track unit

Track unit marathon tiga SLX

item no. 4505V000

- 5 m connecting cable
- travel length 2,600 mm

Track unit marathon tiga SLX

item no. 4506V000

- 5 m connecting cable
- travel length 3,400 mm

Comfort at the press of a button
with the transmitters of SOMMER
